Professional Summary

Aspiring Software Developer with hands-on experience in mobile (Flutter) and web (React, Next.js) development, UI/UX design, and Firebase backend integration. Passionate about creating user-centric applications that improve productivity and engagement. Recently completed a software development internship at Future Interns, gaining practical experience in agile environments and collaborative project development. Eager to leverage skills in building innovative solutions.

Skills

- **Languages & Frameworks:** Dart, Flutter, JavaScript, React, Next.js, HTML5, CSS3
- **Backend & Databases:** Firebase (Firestore, Authentication), SQL
- **Tools & Platforms:** Android Studio, VS Code, Git, Figma
- **Other Competencies:** UI/UX Design (User-Centered Design, Prototyping), RESTful APIs, Data Visualization, Agile Methodologies

Projects

TaskMaster | Flutter, Firebase | (*In Progress*) GitHub: github.com/marube2005/TaskMaster

- Developing a productivity application featuring daily task tracking, motivational quotes, and customizable break reminders to enhance focus for students and youth.
- Integrating Firebase for secure user authentication and real-time synchronization of task data.
- Currently implementing AI-powered task suggestions, an integrated chatbot for support, and voice command functionality.

StudyBae App | Flutter, Firebase, Spring Boot, AWS Admin Panel:

admin-study-bae.vercel.app | App Download: mystudybae.vercel.app

- Designed and developed a comprehensive academic productivity application aimed at Egerton University students, featuring personalized onboarding, progress streaks, and AI-driven content recommendations.
- Engineered a clean, academic-themed UI/UX, incorporating features like inspirational quote notifications and scheduled break reminders.
- Built a dedicated admin portal for efficient content management, including uploading academic resources (past papers, notes) and managing the book database.

Campus Food Delivery App (UI/UX Design) | Figma Figma Prototype: [Figma Link](#) (Link shortened for readability, ensure original works)

- Designed an intuitive Figma prototype for a campus food ordering system, enabling students to order meals from local campus vendors and kitchens.
- Focused on a minimalist aesthetic, ensuring smooth user navigation and adherence to accessibility best practices.

Inventory Management System (In Progress) | Next.js, Python

- Developing a web application to track product inventory, monitor sales, and generate financial reports including revenue and profit/loss statements.
- Implementing features to identify top and least performing products, enabling data-driven stock control and business decisions.

Internship Experience

Software Developer Intern | Future Interns

March 2025 – April 2025 | Remote

Actively contributed to the development of a live weather web application, implementing frontend features using React and Axios while integrating RESTful APIs from a Node.js backend. Worked in a collaborative, agile environment with mentorship support, focusing on debugging, improving user interfaces, and documenting functionality. Gained hands-on experience with REST API consumption, CORS handling, version control (Git), and deployment practices using Vercel and Heroku.

Education

Egerton University | Njoro, Kenya Bachelor of Science in Computer Science Expected Graduation: May 2027 (or specify month)

~~Certifications & Online Learning~~

- ~~Firestore for Flutter Developers – Google Developers (Specify if certified)~~
- ~~UI/UX Design Principles – Coursera (Specify if certificate received)~~
- ~~Responsive Web Design – [Name of Specific Course/Platform, e.g., freeCodeCamp, if applicable]~~
